

Ben Stiles, DC, DACBR
P.O. Box 1628
Blue Springs, MO 64013

Email: stilesdacbr@gmail.com
Website: www.stilesdacbr.com

Credentials:

Dr. Stiles graduated with honors from Cleveland University (Cleveland Chiropractic College – Kansas City) in 1998. He earned his Diplomate of the American Chiropractic Board of Radiology in 2001. Dr. Stiles has been an instructor, clinician and radiology consultant throughout his career. Since 2017 he has focused on his film reading practice and teaching. He has lectured nationally about radiology and x-ray technology/technique/patient positioning to both doctors and chiropractic assistants throughout his career.

Title:

Radiology Case Review Part 2 - Missed Or Mis-Diagnosed? Do Your Eyes Lie?

Goals:

To help doctors improve their radiology interpretation skills, discuss chiropractic cases that can impact their practice, and share research with an emphasis on radiology. Dr. Stiles' videos were created with the intention that the attendees are sitting with him and discussing the chiropractic cases instead of lecturing to them as if on auto pilot. Each case walked into a chiropractic office and was managed by a Doctor of Chiropractic so there is direct clinical implication.

Syllabus:

Hour 1: Introduction of Dr. Stiles

Case 21: Thorax trauma, review a good search pattern for x-ray analysis and discuss a post-traumatic case involving fractures

Case 22: Low back pain patient presented with a sinister diagnosis. Review finding and discuss disease mechanism and spread

Hour 2: Research article review: Whiplash Associated Disorder (WAD), MRI finding related to ligament damage and active range of motion of the cervical spine

Rapid fire quiz #1: rapid case presentation and review of 11 cases

Case 23: Thorax trauma verses disease that was originally overlooked but later walked into the chiropractic office, review finding and discuss thought process for necessary follow up

Hour 3: Case 24: Shoulder severe osteoarthritis verses something more destructive, discuss disease mechanism and pathophysiology

Case 25: Chronic spinal pain with a devastating diagnosis and outcome. Review search pattern, findings and discuss needed follow through

Hour 4: Rapid fire quiz #2: rapid case presentation and review of 11 cases

Case 26: Sport trauma in a kid easily overlooked that can have detrimental outcome if mismanaged
